# Jumpstart Your Joomla Hosting!

## Who Else Wants To Get A Jumpstart With Joomla Hosting?

If you want Joomla Hosting you're probably looking to take advantage of all the benefits Open Source technologies can provide. You already know Joomla is the best Open Source Content Management System on the planet. But it gets even better, because now we can help you get going sooner rather than later...

## Can We Help You Get Started Using Joomla?

Sure Joomla is easy to install. Yes, it's also a snap to manage, and of course it's super reliable. But consider for a moment, how long is it going to take you to do all of this installing and setting up yourself? How do you know which modules, components and plug-ins will work together?

Which are the best features to use for your particular needs? How do you know all the options available to Joomla actually do work together just the way you want them to? Did you even know some components simply don't work together without some 'tweaking'?

Now of course we haven't spoken yet. So naturally I don't know your technical prowess or how long you have to dedicate to getting everything set up just right. Maybe you have the hours, days or even weeks, to get everything just the way you want it, maybe not. You could consider avoiding the time and frustration in advance and take advantage of the months of work we've already done for you.

You Can Have A Fully Operational, Configured, and Integrated Website Ready to Go. And In Less Time Than You Think.

Why do all the hard work yourself? We've spent an enormous amount of time selecting, testing, tweaking and integrating the various Joomla components to deliver a fully hosted and supported Joomla environment.

Are you looking to build your Website and support an eBusiness using Joomla?

If that's you then we've possibly just saved you hundreds of hours of searching, testing, and installation. Could you use this saved time to concentrate on the valuable content you're going to put into your site?

## Who Could Use A Simpler Way?

Just imagine your hosted Joomla web site and future web business is ready to go. It's configured, and set up just the way you want it. All that's waiting is for you to make that decision. Because the hard parts done and it's so easy to use, you no longer have to worry about paying someone else to look after your site.

Of course you still have complete control over your website, that's the beauty of Joomla. And now because Joomla Hosting can provide you with a preconfigured Joomla site, you can instantly get the most out of your site right from day one.

Get Access To The Most Popular Joomla Extensions. They're Built In And Ready For You To Use Instantly.

Many hours were spent scouring the Joomla extensions community. Already installed are 47 of the most popular extensions. This guarantees a rich array of capabilities from the moment you start. From selling online to running

interactive polls, it's all covered straight out of the box.

And this is just the beginning... As we test and integrate more extensions we'll include them for you at no extra cost. These extensions include components, modules, and mambots (plug-ins) that go together to make Joomla a very powerful website environment.

To see the Components you get with your Joomla Hosting set up compared to the standard Joomla install

Even if you wanted to do this yourself, the time you'll save by using our services can be spent working on your specific needs, or those of your client. Just one hour saved using our service each month will pay for the service itself.

If you clicked the Components and Modules links above you'll see the full list. Below is a sample of what you'll be getting the moment you decided to host your Joomla site with Joomla Hosting Australia.

Extension	Feature Description
-----------	---------------------

Like us you're probably cautious of being locked into some long term binding contract. That's exactly why we don't have any. Simply pay on a month to month basis that's it.

That Way You Only Stay If You're 100% Completely Satisfied?

We always value feedback from our customers, it helps us be the best at what we do.

But should you decide for any reason to go elsewhere, you can, no questions asked. Just give us a month notice so we can make sure the transition to your new host is as smooth as possible. That's fair enough, don't you think?

So what does your new-hosted Joomla service include?

- Webmail (Web Based Access)
  
- 1GB of disk space
- 1GB of monthly transfer - Only \$6 ex GST per additional 1GB

What If I don't have a domain name?

If you don't have a domain name, then we'll help you get one. In fact for a limited time only you get a...

Get your own .com /.net /.org domain name for FREE for the life of your hosting account.

This offer will not last for long.

What's the monthly investment for a Joomla Hosting account?

Your Joomla Hosting account is only \$50 per month. No long term contract.

Our research has found some hosting providers charging \$60 or more per month without business grade hosting. And that's without the fully configured and serviced engagement portal. [Click here to get started!](#)

• Additional domain names are only \$25 ex GST per year.

• Additional .au domain names are only \$50 ex GST for two years.

What If I have an existing domain name?

All you have to do is go to the account management area of where your domain name is currently hosted. To redelegate your domain name, where it mentions name servers change the details to the ones listed below.

Primary: ns1.saucedns.com

Secondary: ns2.saucedns.com.

What if I get stuck and have a problem? If you find yourself pulling your hair out or screaming at your computer in frustration...relax. We can provide the support and take you step-by-step in getting you set up.

What about the technical side of our hosting services?

Your Joomla Hosting Is Underpinned With Business Grade Hosting

• Our high spec dual Xeon servers are located in a high security data centre in Brisbane, Australia.

You can breath easy knowing your information is under 24-hour surveillance.

• We have high performance, cost effective redundancy in place.

This includes:

- RAID1 10,000-rpm hot swappable SCSI drives.
  - Seven hot pluggable cooling fans per server.
  - Dual power supplies on separate monitored power rails.
  - Dual network cards on separate network switches.
- Plus spare drives and fans in-rack ready to go on the rare chance they're ever required.

- Backups are performed to disk and to tape every day.
- You have redundant servers in place to facilitate rapid recover in case of a critical systems failure.
- RedHat Linux and cPanel are utilised to ensure quality of hosting services.
- PHP 4.4.2
- Perl 5.8.7
- Apache Web server
- Red Hat Linux Server OS
- Webmail interface
- Cron Tasks
- WebAlizer and AWStats

Discover How To Save Time, And Still Add Greater Value Building Websites For Others!

Are you an existing Web Designer? Maybe you're a Graphic Designer wanting to add web services for your clients. All businesses these days require a web presence. Maybe you've been asked to help out a colleague, a business partner, or perhaps your company put you in charge of taking care of the website.

Our service allows you to outsource many of the risks (and time) associated with this responsibility so that you can focus on the specific requirements of the job.

Would it be easier to let us manage the infrastructure so that you can focus on your customers needs? Better still, the suite of features included in the hosting service is a flexible online solution, allowing you to deliver capabilities even faster than before. You can reap the rewards by providing even more value to your clients than they were expecting.

Consider when those "quick changes" or "urgent requests" come in. You'll be more effective than ever, and your colleagues will be thrilled with what you can do to help.

If you're called upon do this for many businesses, then contact us to discuss our reseller plans. Why not earn more money by doing what you're doing anyway.

If you've read this far I am going to assume you're interested in what we have to offer you, so do yourself a favour don't delay any longer, contact us today.

Perhaps you need to discuss it with one of our eBusiness Consultants. Leave your details and we will get in touch to discuss your needs in greater detail. Yes, please contact me!

Let's see what we can do to help you achieve your goals.

Joomla Hosting Australia

P.S. domain name currently being offered with your Joomla Hosting may be removed any moment. To take advantage of this now before it's gone [click here](#).

P.P.S. Whether you chose to go it alone or let us help you, I wish you all the best with your efforts. Joomla is a fantastic option for your website needs, you're making a wise decision.
